Samut Prakan, Bangbo 10560

I consistently find ways to polish and improve both my penetration testing skills and soft skills to be 1% better every day. My goal is to become a cybersecurity professional who contributes to the greater good of the cybersecurity field.

Professional Experience

PwC Thailand, Full-time

April 1, 2025 – Present

Penetration Tester

- Experienced in AI LLM penetration testing for a bank client
- Identified a critical vulnerability that exposed customer PII during a black-box external assessment for a banking client
- Identified a high-impact cloud security misconfiguration for a banking client
- The first RCE finder in PwC Thailand
- Developed a custom adversary simulation tool that successfully evaded enterprise-grade antivirus and EDR controls during a red teaming engagement.
- AppSec penetration testing
- Network penetration testing
- Wi-Fi penetration Testing

Siam Thanat Hack, Full-time

Nov 1, 2024 – Feb 25, 2025

Penetration Tester

- Web Application penetration testing
- Mobile Application penetration testing
- Malware analysis
- Incident response
- CTF Creator for Women Thailand Cyber Top Talent 2024

Vulnerability disclosure

CVE

**Note: More security contributions can be found on my GitHub profile. **

- **HP® HyperX NGENUITY (CVE-2025-10568)**
  - found an Arbitrary Code Execution vulnerability in HP software, discovered through analysis of Windows processes. [ref]
- **Electronic Arts - Dragon Age: Origins (CVE-2024-57276)**
  - found an unquoted service path vulnerability in Electronic Arts Dragon Age: Origins, discovered through analysis of the insecure DAUpdaterSVC Windows service. [ref]
- **SuiteCRM – Enterprise CRM (CVE-2026-29106)**
  - Found a blind XSS in SuiteCRM. Acknowledged as a security contributor in the release note. [ref]

Bug bounty & VDP

**Note: More security contributions can be found on my HackerOne profile. **

- **Razer bug bounty program**
  - reported a security issue to Razer bug bounty via Inspectiv platform. [ref]
- **Sony vulnerability disclosure program**
  - reported a high-severity vulnerability to Sony via the HackerOne program. [ref]

Misc.

- **ThaiCERT Letter of Appreciation**
  - An appreciation letter for security contributions to national cybersecurity. [ref]
- **ExploitDB exploit author** Authored an ExploitDB entry for CVE-2024-48827 (Watcharr 1.43.0), developed a public exploitation for a JWT misconfiguration that allowed privilege escalation via blank secret validation. [ref]

Technical Blog

GitBook blog: https://suphawith-phusanbai.gitbook.io/book-of-suphawith/

- A repository of my security research, featuring in-depth write-ups on malware analysis, CVEs, and vulnerability discoveries.

Certifications

1. Offensive Security Certified Professional (OSCP)

Figure 1: https://www.credential.net/6c571871-4cbb-4bee-b996-e28476632b87#acc.DOuw915E

2. Certified Penetration Testing Specialist (CPTS)
